Grading criteria

The result should be a clearly presented model that can be realistically implemented. Following criteria will be used to grade solutions:

Criteria	Grade Range	Contributes to Total Grade	Note
Completeness of solution – including project documentation	0-5	40%	Project documentation should contain chapter which cover each of segments in CRISP-DM methodology to describe how team understood requirement, which steps did they considered, discarded and/or implemented for current use-case
Technical documentation	0-5	10%	It should at least have documented all steps of how to run process and get output results either textually or visually
Feasibility of the solution	0-5	10%	
Presentation	0-5	20%	
Quality of the solution	0-5	20%	
	TOTAL :	100%
